

THE INVESTOR FORUM

Investor Forum Response to the Business, Energy & Industrial Strategy Committee's Corporate Governance Report

5th April 2017

The Select Committee's report makes some important recommendations which seek to further enhance the UK's strong heritage in Corporate Governance and contribute to a rebuilding of trust in business.

In the last two years the Investor Forum has established a unique framework for collective engagement and has worked intensively to enhance long-term value with a number of major companies.

We welcome the constructive recommendations of the Select Committee and the recognition of the Investor Forum's contribution to the UK's stewardship landscape. We look forward to working with investors and UK companies to explore measures to further enhance dialogue.
